

Showcase YOUR Professional Work & Research @ ODN Net March 9 Meeting!

We at the DFW OD Network are committed to finding innovative ways of sharing our experiences, research, frameworks, and cases. Our March 9 monthly meeting will feature 6 to 8 selected speakers who will each deliver a 10-minute TED Talk style presentation that is both experiential and engaging on one of the following three topic areas:

Current Business of OD

Highlight OD practices that are having a profound impact by leading efforts in organizational redesign, transformational change, leadership development and effective team collaboration.

Future Direction of OD

There is abundant research in the field of OD. In this topic area, professionals can share ground breaking and emerging OD concepts, models, frameworks and research.

Technology of OD

With the booming change of technology and social media, it's important to stay current. Speakers who pick this topic area can provide insights on how to embrace technology, strengthen skills and learn new tools.

Because of the limited number of time slots, interested speakers are request to submit a one page outline highlighting the topic of their talk, highlights of content, objectives and benefits to the audience as well as the impact to the field.

Submission outlines should be emailed to Sandhya Johnson and Terri Adkission by February 27, 2017 (Sandhya@ingenium.global ; tadkisson@nflxn.com).

[DFW OD Network](#) is a great place for internal and external consultants in the field to share their ideas and get feedback from experienced professionals. We look forward to your participation!
